ANNUAL REPORT

Report from the Supervisory Board

The Supervisory Board is pleased to present the audited annual accounts of the Frontier Clearing Corporation B.V. (hereinafter “Frontclear” or “FCC”).

Frontclear is a financial markets development company focused on catalysing more stable and inclusive financial markets in emerging and developing countries (EMDC). Frontclear facilitates access to interbank markets for local financial institutions in EMDCs through the provision of credit guarantees to cover a transacting institution’s counterparty credit risk and through the establishment of financial market infrastructure.

High counterparty risk and a limited supply of high quality collateral in EMDCs contribute to high credit spreads, resulting in limited access to interbank financial markets for local institutions. Collateral is central to credit risk mitigation in modern financial markets, yet the market for local currency collateral is almost non-existent, or inaccessible. The result is that interbank markets remain segmented and local institutions have limited ability to manage liquidity and market risk positions needed to be able to responsibly support their clients, notably for trade finance and other SME lending. FCC supports local institutions by guaranteeing their exposures subject to posting of local currency collateral.

FCC has issued its first guarantees in 2016 and has established and extended commercial relationships with both global and local financial institutions in multiple continents, signifying the relevance of the proposition of FCC in the current financial market environment.

The Supervisory Board wishes to thank the Management Board and staff for their solid contribution in 2016.

Amsterdam, 18 May 2017,

The Supervisory Board of Frontier Clearing Corporation B.V.,

Mr. Axel van Nederveen (Chairman)
Mr. Michael Bristow
Mr. Bokar Cherif
Mr. Thomas Heinig

Report from the Managing Board

Frontclear Management B.V. is the statutory director of Frontier Clearing Corporation B.V (hereinafter “FCC” or the “Company”) and pursuant to the FCC Management Agreement acts as the manager of FCC. The Managing Board of Frontclear Management B.V. (hereinafter “FCM” or the “Manager”) is pleased to present the audited annual accounts of FCC.

2016 was FCC’s first full year of operations. Management remained resolutely focused on the establishment of operational infrastructure, conclusion of onboarding by our partner beneficiaries and the ongoing development of our transaction pipeline. FCC closed the year with a guarantee portfolio of USD 40 million in notional and generated its first gross guarantee fees of USD 1.1 million, with gross earnings reported on a fair value basis as USD 829,127 for the year. The reported net operating loss of USD 2.7 million is consistent with the original target of breaking even within 5 years of the first financial close.

During the year under review FCC received new funding commitments from the Frontier Clearing Funds. The German Federal Ministry for Economic Cooperation and Development committed USD 2.2 million to the Frontier Clearing Fund Subordinated whilst FMO, the Dutch development bank, approved a USD 30 million participation in the Frontier Clearing Fund Senior. FMO’s funding was subsequently committed after the reporting period on 13 February 2017. These commitments have been reflected under the Profit Participating Notes issued by FCC to the Frontier Clearing Funds. In total, FCC has thus increased its available capital under the PPN Agreement to USD 112.3 million. The additional funding is key to supporting our projected growth path and is further testimony to the value of FCC’s development mandate.

FCC is a financial markets development company with a long-term impact strategy focused on building more inclusive and stable financial markets in emerging and frontier economies. To this end, our impact strategy is broadly split in two overlapping phases. The first 5-year phase is primarily focused on achieving financial sustainability, whilst delivering impact by means of facilitating demonstrative cross-border bilateral OTC transactions between our global partner beneficiaries and local obligors. These transactions introduce best practice to local markets and identify the practical priorities for local financial market infrastructure development and impact interventions. In FCC’s second phase, the focus will increasingly shift to the establishment of onshore financial infrastructure and to the facilitation of onshore local financial markets.

Within this long-term impact context, we are pleased to report early evidence of the effectiveness of our impact strategy. The strong link between transaction execution capability and long-term financial markets development is illustrated in both Kenya and Nigeria, where we closed our first transactions. On the back of these transactions, the Frontclear Technical Assistance Program (“FTAP”) has initiated several strategic projects aiming to establish local financial infrastructure. These include conducting a feasibility study for the establishment of a central clearing counterparty in Nigeria and supporting Kenya’s Capital Market Authority to improve legislative certainty for swap and repo transactions. More generally, FTAP achieved full scale operations in Africa during 2016, having launched market wide training programs in multiple countries. Outside of Africa, FTAP supported the Central Bank of Georgia and ICMA with funding to obtain an industry wide clean legal opinion for the enforceability of GMRA documentation. For more information on these and other impact results, please see our 2016 Impact Report.

The outlook for 2017 is positive. The Management Board expects to remain on target for achieving break-even within the first five years of operation, with FCC’s portfolio growth projected to accelerate on the back of the commercial efforts deployed to date.

FCC does not have any employees and is fully managed by FCM. The results mentioned above would not have been achieved without the dedication of the staff of FCM and our third-party service providers.

Amsterdam, 18 May 2017,

The Managing Board of Frontclear Management B.V.,

Mr. Philip Buyskes, Chief Executive Officer
Mr. Erik van Dijk, Chief Risk & Finance Officer

Notes to the financial statements

1. General information

Frontier Clearing Corporation B.V. ("FCC" or "the Company") is a financial markets development company focused on catalyzing more stable and inclusive financial markets in emerging and developing countries ("EMDCs"). FCC facilitates access to financial markets for local institutions in EMDCs through the provision of credit guarantees to cover a transacting institution's counterparty credit risk.

FCC guarantees are made available under the condition that local currency collateral is posted by the institution that is guaranteed. FCC works in partnership with financial market infrastructure providers to build more stable and efficient market places.

The registered address of FCC is Mauritskade 63, 1017 WV, Amsterdam, The Netherlands. The company is registered with Chamber of Commerce number 61998583, and was incorporated on 1 December 2014.

FCC's operations are managed by Frontclear Management B.V. ("FCM") under the terms of the FCC Management Agreement. The administrating function has been outsourced to DLM Finance B.V.

2. Events after the reporting period

On 13 February 2017, the commitment of FCC Senior to invest in Senior Notes was increased from USD 45 million to USD 75 million.

On 28 February 2017, the Supervisory Board of FCC awarded FCM with a Performance Fee being the sum of USD 207,829 and EUR 140,938. FCC has been invoiced by FCM for the amount of EUR 140,938 relating to the variable compensation of FCM staff. The remainder of the Performance Fee is vested until FCC breaks even in accordance with the conditions set forth in the FCC Management Agreement.

The Performance Fee will be recognized in 2017 accordingly.

3. Statement of compliance

The financial statements of FCC have been prepared in accordance with International Financial Reporting Standards as adopted by the European Union (IFRS-EU) and Part 9 of Book 2 of The Netherlands Civil Code.

The financial statements were authorized for issue by the Managing Board on 18 May 2017.

4. Summary of significant accounting policies

Basis for preparation

The financial statements are prepared on a fair value basis for financial assets and financial liabilities. Certain financial assets and financial liabilities are stated at amortized cost.

New standards, amendments and interpretations to existing standards which are relevant to FCC

In December 2014, the IASB issued amendments to IAS 1 which are effective as per 1 January 2016 as part of the IASB's Disclosure Initiative and has been endorsed by the EU in December 2015. The amendments clarify the materiality guidance in IAS 1. FCC has adopted this standard for the current reporting period with no significant impact as it only impacted line items and non-significant notes.

New standards, amendments and interpretations to existing standards which are relevant to FCC and not yet effective

IFRS 9 Financial Instruments – IFRS 9 (2009) introduces new requirements for the classification and measurement of financial assets. Under IFRS 9 (2009), financial assets are classified and measured based on the business model in which they are held and the characteristics of their contractual cash flows. IFRS 9 (2010) introduces additional changes relating to financial liabilities. The IASB has finalized its project to make limited

amendments to the classification and measurement requirements of IFRS 9 and add new requirements to address the impairment of financial assets and hedge accounting.

IFRS 9 (2010) and (2009) are effective for annual periods beginning on or after 1 January 2018. The EU endorsed IFRS 9 on 22 November 2016. The assessment of FCC is that the impact on the valuation of financial guarantees will be limited, given that the typical tenor of guarantees issues is equal to or less than one year and the determination of the fair value of the guarantees largely corresponds to the requirements of IFRS 9.

IFRS 15 Revenue from Contracts with Customers - The IASB has issued a new standard for the recognition of revenue. This will replace IAS 18 which covers, amongst others, contracts for goods and services. The new standard is based on the principle that revenue is recognized when control of a good or service transfers to a customer – so the notion of control replaces the existing notion of risks and rewards.

A new five-step process must be applied before revenue can be recognized:

- Identify contracts with customers
- Identify the separate performance obligation
- Determine the transaction price of the contract
- Allocate the transaction price to each of the separate performance obligations, and
- Recognize the revenue as each performance obligation is satisfied.

Key changes to current practice are:

- Any bundled goods or services that are distinct must be separately recognized, and any discounts or rebates on the contract price must generally be allocated to the separate elements.
- Revenue may be recognized earlier than under current standards if the consideration varies for any reasons (such as for incentives, rebates, performance fees, royalties, success of an outcome etc) – minimum amounts must be recognised if they are not at significant risk of reversal.
- The point at which revenue can be recognised may shift: some revenue which is currently recognised at a point in time at the end of a contract may have to be recognised over the contract term and vice versa.
- There are new specific rules on licenses, warranties, non-refundable upfront fees and, consignment arrangements, to name a few.
- As with any new standard, there are also increased disclosures.

FCC is currently assessing the impact on the Funds financial statements based on the new requirements of IFRS 15 which is expected to be limited.

Foreign currency translation

Functional currency and presentation currency

The functional currency of FCC is the United States Dollar ("USD"), reflecting the fact that the majority of the transactions are settled in USD. FCC has adopted the USD as its presentation currency as the contributions made by the investors of the Fund are denominated in USD.

Transactions and balances

All recognized assets and liabilities denominated in non-USD currencies are translated into USD equivalents using year-end spot rates. Transactions in foreign currencies are translated at the rates of exchange prevailing at the date of the transaction. Resulting exchange differences on the financial instruments at fair value through profit or loss in foreign currencies are recorded in the income statement as part of the investment result. Realized and unrealized exchange differences on other assets and liabilities are also recorded in the income statement and disclosed as foreign currency translation results.

Financial Instruments

Classification

FCC classifies its investments in cash accounts, term deposits, interest receivable and other payables as financial instruments at amortized costs whose carrying amounts approximate fair value because of the short nature and the high credit quality of counterparties. Its investments in money market funds and term deposits are at fair value through profit or loss.

FCC classifies its Subordinated, Junior and Senior Notes (together the “Profit Participating Notes” or “PPN”) as financial liabilities in accordance with the substance of the contractual arrangements, given that the total expected cash flows attributable to the instruments over its life are not based substantially on the profit, the change in the recognized net assets, or the change in the fair value of the recognized and unrecognized net assets of FCC during the life of the instrument.

FCC classifies its issued financial guarantee contracts as financial liabilities at fair value through profit or loss.

Recognition

FCC recognizes a financial instrument on its balance sheet when it becomes a party to the contractual provisions of the instrument. Financial instruments are initially recognized using trade date accounting. Gains and losses are recognized from this date on. Drawdowns under the PPN are treated as loans. A further description of this feature is disclosed in Note 11.

Measurement

Financial instruments are initially measured at fair value (transaction price). Transaction costs on financial instruments at fair value through profit or loss are expensed immediately. After initial recognition, financial liabilities at fair value through profit or loss are measured at fair value, with changes in their fair value recognized as gains or losses in the statement of comprehensive income.

Fair value measurement principles

For all financial instruments which are highly rated and liquid such as money market funds or deposits for which reference prices are available in an active market, the fair value is determined based on market standard cash flow methodologies and are further referred to as Level 2 financial instruments.

The fair value of the Profit Participating Notes is set equal to the exit value of the assets. The exit value is the higher of the redemption value based on the level of Available Cash in accordance with the PPN Agreement and the value determined by a discounted cash flow model. A further description of the valuation of the PPN is disclosed in Note 10.

The fair value of financial guarantees at initial recognition is equal to the consideration received for the guarantee at inception. Subsequent measurement is based on a model that reflects the probability of default of the obligor whose obligations are guaranteed, the expected exposure at time of default and the loss given default assumptions, with changes in their fair value recognized as gains or losses in the statement of comprehensive income. A further description of the valuation of the financial guarantee contracts is disclosed in Note 13.

Derecognition

FCC derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for de-recognition. A transfer will qualify for de-recognition when the Company transfers substantially all the risks and rewards of ownership. A financial liability is derecognized when the obligation specified in the contract is discharged, cancelled or expired.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the assets and settle the liability simultaneously.

Impairment

FCC recognizes a loss allowance for expected credit losses on financial guarantee contracts. The loss allowance is measured at an amount equal to the lifetime expected credit losses if the credit risk has increased significantly since initial recognition.

The date of initial recognition is the date that FCC became a party to the irrevocable commitment.

Intangible fixed assets

Intangible fixed assets are presented at cost less accumulated depreciation. Depreciation is based on the estimated useful life and calculated as a fixed percentage of cost, taking into account any residual value. Depreciation is provided from the date an asset comes into use.

Cash and cash equivalents

Financial instruments are classified as cash and cash equivalents when the financial instruments are short-term positions which are highly liquid that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Unless indicated otherwise, they are at the Company's free disposal.

Statement of cash flows

The statement of cash flows is prepared according to the direct method. The statement of cash flows shows FCC's cash flows for the period divided into cash flows from operations and financing activities and how the cash flows have affected cash balances.

Accrued expenses and other payables

Accrued expenses and other payables are initially measured at fair value and subsequently measured at amortized cost using the effective interest method.

Income and expense recognition

Income is recognized to the extent that it is probable that the economic benefits flow to FCC and the income can be reliably measured.

Interest income and expenses are recognized as the interest accrues (taking into account the effective yield on the asset).

Interest received by FCC may be subject to withholding tax imposed in the country of origin. Interest and dividend income is recorded gross of such taxes.

The management fee is based on invoices and is subject to the budget approved by the Supervisory Board. The performance fee is determined based on a separate performance assessment by the Supervisory Board against the performance targets agreed with FCM.

Other fees and expenses such as guarantee expenses are recognized in profit or loss as the related services are performed.

Depreciation and amortization

The calculation of depreciation of fixed assets is based on the purchase price or cost of manufacture. Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets. Realized capital gains and losses on the disposal of fixed assets are included under depreciation and amortization expenses.

Taxation*Current income tax*

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognized directly in equity is recognized in equity and not in the statement of profit or loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax liabilities are recognized for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Events after the reporting period

The financial statements are adjusted to reflect material events that occurred between the end of the reporting period and the date when the financial statements are authorized for issue, provided they give evidence of conditions that existed at the reporting date. Material events that are indicative of conditions that arose after the balance sheet date are disclosed, but do not result in an adjustment of the financial statements themselves.

Significant accounting estimates and judgment in applying accounting policies

Application of the accounting policies in the preparation of the financial statements requires FCC to apply judgment involving assumptions and estimates concerning future results or other developments, including the likelihood, timing or amount of future transactions or events. There can be no assurance that actual results will not differ materially from those estimates. Accounting policies that are critical to the financial statement presentation and that require complex estimates or significant judgment are described below.

Significant accounting estimates

The fair value measurement of financial instruments include valuation based on non-market observable inputs. The determination of the fair value for the Profit Participating Notes and the financial guarantee contracts are based on non-observable inputs. See for further explanation Note 11 and 13 where the inputs are described including the impact of each variable for the determination of the fair value as well as the sensitivity towards each fair value.

Judgement

In the process of applying FCC's accounting policies, FCC has made the following judgement, apart from those involving estimations and assumptions, which have the most significant effect on the amounts recognized in the financial statements. FCC determines the classification of positions in money market funds as disclosed in Note 7 as cash and cash equivalents, as the positions at money market funds are short-term, highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value.

Going concern

The Manager has made an going concern assessment and is satisfied that FCC has the resources to continue in business for the foreseeable future. The Manager is not aware of any material uncertainties that may lead to significant doubt about the FCC's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on a going concern basis.

5. Risk Management

FCC's activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risks is core to the financial business, and the operating risks are an inevitable consequence of being in business.

FCC aims to achieve an appropriate balance between risks and return and minimize potential adverse effects on its financial performance. The Company's risk management policies are designed to identify and analyze these risks, to set appropriate risk limits and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. FCC regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice. FCC carries out risk management. Specific risk management measures related to the financial year include the monitoring of the limits of liquid investments.

Market price risk

Market price risk is the risk that the value of an instrument fluctuates as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

FCC limits the average duration of its liquidity investments to two years. At 31 December 2016, the Company has no assets or liabilities subject to significant market risk.

Interest rate risk

The general purpose of managing interest rate risk is to limit the adverse impact of interest-rate fluctuations on the net asset value of the Company. The Company is exposed to interest rate risks in connection with interest bearing assets and liabilities.

The majority of the Company's financial liabilities are issued on a floating rate basis, i.e. the Senior Notes. FCC monitors its interest rate exposure in relation to its floating rate obligations by means of a gap report. The proceeds of the Junior Notes and Subordinated Notes, i.e. the fixed rate financial liabilities of FCC, are invested with a maximum average duration of two years.

At 31 December 2016, the proceeds of the Notes were invested in instruments with an interest rate sensitivity of less than two months. See Note 7 for information on liquidity investments.

Foreign currency exchange rate risk

The Company may hold financial instruments denominated in currencies other than the USD, the functional currency. It may therefore be exposed to currency risk, as the value of the financial instruments denominated in other currencies fluctuates due to changes in exchange rates.

FCC does not engage in open currency positions for the purpose of investing its liquidity. In case FCC is exposed to local currency instruments as a result of the default of one of its risk clients, the maximum allowed foreign currency exposure is limited by means of one-month Value-at-Risk limits per currency and in aggregate. The maximum one-month Value-at-Risk in aggregate with a 97.5% confidence interval is limited to USD 15 million.

During the financial year, the Company has not been exposed to significant foreign currency exposure.

Liquidity risk

Liquidity risk is defined as the risk that an entity encounters difficulty in meeting obligations associated with financial liabilities and off-balance sheet instruments.

FCC is mainly exposed to liquidity risk in case it receives a call for payment under financial guarantees issued. FCC mitigates its liquidity risk by testing the adequacy of its liquidity buffer under certain stress scenarios, where both credit losses on its liquidity investments and losses under financial guarantees are considered.

Credit risk

Credit risk is defined as the risk that one party to a financial instrument causes a financial loss for the other party by failing to discharge an obligation. Credit risk arising from the inability of a counterparty to meet the terms of the Company's financial instrument contracts exists as the Company has entered into significant financial instrument transactions that are exposed to credit risk.

FCC has limited the minimum counterparty rating for the purpose of investing liquidity to AA- and has assigned counterparty limits based on counterparty rating and type of financial instruments to ensure diversification in its liquidity investments.

The following table shows the credit exposure for liquidity investment as at December 31, 2016:

(all amounts in USD)	Credit rating	Exposure 2016	Exposure 2015
Money market funds	AAA	20,000,000	20,000,000
Term Deposits	AA-	7,500,184	11,451,886
Cash positions	AA-	3,767,149	24,797
Total		31,267,333	31,476,683

FCC is exposed to credit risk under the financial guarantees it has issued to cover the counterparty credit risk on interbank transactions, where the risk client is typically located in an emerging or frontier market. The exposure under financial guarantees issued is affected by both country risk factors and credit risk factors relating to the risk client.

FCC assigns country limits and counterparty limits based on a fundamental analysis of the country and counterparty. The maximum net notional exposure per country is limited to USD 30,000,000 and the maximum net notional exposure per counterparty to USD 15,000,000. The maximum amount of guarantees that FCC can issue against available liquidity is controlled by both a deterministic economic capital model and a stochastic capital model.

The following table shows the notional amounts of outstanding guarantees per country:

(all amounts in USD)	Gross notional exposure	Hedged	Net notional exposure	Fair Value
Kenya	25,000,000	(10,000,000)	15,000,000	116,330
Nigeria	15,000,000	-	15,000,000	140,209
Total	40,000,000	(10,000,000)	30,000,000	256,539

Hedged exposure

FCC has obtained credit insurance to hedge USD 10 million of its gross notional exposure. The timing and the maturity of the hedged agreement aligns with the maturity of the gross exposure.

Capital models

FCC assigns economic capital to each of its exposures under guarantees based on the exposure at default and loss given default of the underlying transaction. The exposure at default and loss given default are informed by the recovery rates of any collateral posted against the underlying transaction and the average expected depreciation of the local currency involved over the liquidation period, conditional upon a default of the risk client under severe economic circumstances. FCC does not consider a probability of default of less than 100% for each exposure until the exposures in the portfolio are sufficiently diversified. The average expected depreciation used for economic capital calculations at 31 December 2016 is set to 40%.

The stochastic capital model determines the ability of FCC to meet its obligations under outstanding financial guarantees by simulating defaults in the portfolio in a Monte Carlo analysis based on the probability of default and correlation statistics of external rating agencies and determining the loss relating to each default based on stressed depreciation of the currency. The result of the stochastic capital model is expressed as the implied rating of FCC in accordance with the rating methodology of the external rating agencies. The minimum implied rating for FCC is set to A- and as at 31 December was AAA.

6. Intangible fixed assets

(all amounts in USD)	2016	2015
Balance as per beginning period	206,017	-
Movements		
Investments	-	274,689
Depreciation	(91,563)	(68,672)
Balance movements during the period	(91,563)	206,017
Balance as at 31 December	274,689	274,689
Accumulated depreciation	(160,235)	(68,672)
Book value as at 31 December	114,454	206,017
Intangible fixed assets represents license fees for a software application.		
Annual depreciation percentage	33%	33%

7. Cash and cash equivalents

(all amounts in USD)	2016	2015
Money market funds	20,000,000	20,000,000
Term deposits	7,500,184	11,451,886
USD cash account	1,565,893	23,296
Cash in transit	2,200,000	-
EUR cash account	1,256	1,501
Total cash and cash equivalents	31,267,333	31,476,683

No restrictions to the usage of cash and cash equivalents exists at year end. Interest income related to cash and cash equivalents amounted to USD 140,432 (2015: USD 21,045). The cash in transit has been received 3 January 2017.

8. Issued share capital

The authorized and issued share capital consists of 1 ordinary share of € 1 and has been fully paid. Frontclear Management B.V. holds the share of FCC.

9. General reserve

(all amounts in USD)	2016	2015
Balance as at beginning of period	-	-
Distributed from undistributed result for the period	224,113	
Balance as at 31 December	224,113	-

10. Undistributed result for the period

(all amounts in USD)	2016	2015
Balance as at beginning of period	224,113	-
Distributed to general reserve	(224,113)	-
Comprehensive income for the period	(31,769)	224,113
Balance as at 31 December	(31,769)	224,113

Minimum capital requirement

FCC as separate entity is not subject to any internal or external imposed minimum capital requirement.

11. Long term liabilities

The long term liabilities are detailed as follows:

(all amounts in USD)	Junior Notes	Subordinated Notes	Total
Total position at beginning of period	26,400,000	4,564,156	30,964,156
Notes issued during the period	-	2,200,000	2,200,000
Revaluation during the period	-	(2,696,167)	(2,696,167)
Total position at 31 December 2016	26,400,000	4,067,989	30,467,989

(all amounts in USD)	Junior Notes	Subordinated Notes	Total
Total position at beginning of period	-	-	-
Notes issued during the period	26,400,000	8,700,000	35,100,000
Revaluation during the period	-	(4,135,844)	(4,135,844)
Total position at 31 December 2015	26,400,000	4,564,156	30,964,156

Senior Notes

Subject to the terms and conditions of the PPN Agreement between FCC and Frontier Clearing Fund Senior ("FCF Senior") dated 27 March 2015, FCF Senior is committed to invest in Senior Notes to be issued by FCC for a maximum of USD 45 million. As per 31 December 2016, no Senior Notes were issued (2015: no Senior Notes issued).

Junior Notes

Status

The Junior Notes of USD 26,400,000 were issued to Frontier Clearing Fund Junior ("FCF Junior") on 15 April 2015 and have been fully paid.

Repayment and interest

FCC pays each quarter on the first business day of April, July October and January of each calendar year all of its Available Cash remaining after FCC has paid all accrued Standby Fee, Commitment Fees, Liquidity Fees and DTAF Fees (if applicable) and (ii) reduced by the total amount of any outstanding Senior Funds (as per 31 December 2016 USD nil), Junior Funds (as per 31 December 2016 USD 26.4 million) and Subordinated Funds (as per 31 December 2016 USD 8.7 million) as interest on the Junior Notes. During the period, no interest has been paid.

The Junior Note shall be repaid in full on 15 April 2030. However, FCF Junior has the option during the period 15 April 2028 through 15 April 2029 to postpone the repayment date to 15 April 2040. Repayment of Junior Notes is subject to Available Cash and ranks junior to repayment of the Senior Notes and senior to repayment of the Subordinated Notes.

Subordinated Notes

Status

The first Subordinated Notes were issued to Frontier Clearing Fund Subordinated ("FCF Subordinated") on 15 April 2015 with a total commitment of USD 8,700,000 and have been fully paid. On 29 December 2016, FCC issued an additional USD 2,200,000 in Subordinated Notes, for which payment has been received. The total amount of outstanding Subordinated Notes at 31 December 2016 is USD 10,900,000.

Repayment and interest

FCC pays each quarter on the first business day of April, July, October and January of each calendar year the DTAF Fee of 2% per annum.

The Subordinated Notes shall be repaid in full on 15 April 2030. However, FCF Subordinated has the option during the period 15 April 2028 through 15 April 2029 to postpone the repayment date to 15 April 2040. The repayment of the Subordinated Notes is subject to Available Cash and ranks junior to the repayment of Senior Notes and Junior Notes.

Fair value Junior Notes and Subordinated Notes

The Junior Notes and Subordinated Notes, together referred to as the Profit Participating Notes ("PPN" or the notes), can only be transferred subject to the approval of FCC and the investors in the respective notes. The PPN have not been traded and are unlikely to trade as a financial investment only outside of the most advantageous market. As a result, the fair value of the PPN is not obtained from market prices, but derived from a level 3 proxy model as further described below.

The most advantageous market for the Notes is formed by investors encompassing governments, development finance institutions and other strategic investors that will value the business of Frontclear beyond the financial return offered by or the fair value of the instruments, in line with their development angle. These investors can therefore accept financial returns that may deviate significantly from those sought after by commercial investors.

Compared to the previous reporting period, where the Company estimated the value using a discounted cash flow model, the Fund reassessed and adjusted the valuation model to improve the alignment with the Fund's business planning process by reducing the number of significant unobservable inputs to the key drivers of the financial performance. The adjustment of the model has not impacted on the reported fair value per 31 December 2016 (see further information below).

FCC reports the value of the PPN on a monthly basis in line with the Valuation Policy approved by the investors. The Valuation Policy determines the value of the PPN to be equal to the redemption value, i.e. the amount that is due under the PPN in case FCC were to execute the redemption of the notes on the reporting date. A further description of the redemption value is provided below.

Level 3 proxy model

FCC values the PPN with a proxy model, that projects the expected value of cash available in FCC for distribution to the investors in the PPN at the redemption date of the notes.

The model uses the following significant unobservable inputs for determining the fair value:

Description	Definition
Risk Capital	Risk Capital is the capital committed to FCC, i.e. the total amount of PPN issued plus any undrawn commitments to invest in PPN. The risk capital is specified in both amounts and the average lifetime that it will be available to FCC;
Leverage allowed	The leverage is the maximum factor of outstanding guarantee portfolio over risk capital allowed;

Pricing	The average guarantee fee earned over the projected horizon;
Utilization rate	The average level of risk capital allocated over the projected horizon;
OPEX	The level of annual operational expenses of FCC;
Risk costs	The expected loss incurred in the portfolio of guarantees issued over the projected horizon.

The product of risk capital, leverage factor, average guarantee fee and utilization rate provides an estimate of the amount of income that FCC will generate over the remaining life of the PPN. The level of annual operational expenses and risk costs over the life of the PPN estimates the total amount of expenses. The model assumes cash and net profits are reinvested in the observable cash rate and distributions under the PPN are reinvested at the prevailing discount rate for the notes until the redemption date. The discount rates for the notes reflect the return expectation of investors in the most advantageous market for FCC are derived from the most recent transactions in the notes.

The projection of the cash available at redemption date with the assumption of reinvestment of cash flows leaves the valuation model insensitive to timing differences between cash inflows and outflows. Any timing differences between cash inflows and outflows may in practice lead to a lower utilization of risk capital, which consideration is included in setting the utilization rate. Given the uncertainty in projecting timing and size of future cash flows up to the redemption date, this modelling simplification is deemed acceptable.

Redemption value

The redemption value of the PPN is based on the contractual cash flows attributable to the notes under the PPN Agreement. In accordance with the PPN Agreement, the redemption value is determined by the level of Available Cash to be attributed to each class of the PPN in line with their ranking.

The level of Available Cash is equal to the fair value of cash and cash equivalents, minus a provision for amounts to be paid under legally binding obligations and expenses and minus the reasonable remuneration to the shareholder of FCC, defined in the PPN Agreement as 5% of the Approved Budget. The Approved Budget is the budget of operational expenses relating to the financial period, as approved by the FCC Supervisory Board. The Approved Budget for 2016 is equal to USD 2,636,000.

For the purpose of the determination of the fair value of the PPN, the provision for amounts to be paid under legally binding obligations, i.e. financial guarantees issued, is set equal to the fair value of the outstanding guarantees on the reporting date.

Fair value end of period

The fair value of the PPN's at 31 December 2016 is the value derived from the level 3 proxy model plus the amount by which the redemption value of the notes based on the PPN Agreement exceeds that value, if any. For the purpose of fair value measurement, the model does not take into account any issuance of PPN beyond the level of confirmed commitments.

The amount by which the redemption value exceeds the modeled value reflects the value of the collective right of the investors in the Frontier Clearing Funds to liquidate the funds and thus consequently FCC. The investors in the Frontier Clearing Funds have the right to liquidate the Frontier Clearing Funds at any time subject to Investor Special Consent, i.e. with more than 80% of votes or the consent of all investors minus one. Furthermore, the Joint Investor Meeting will vote to continue the Frontier Clearing Funds within 30 days of 15 April 2018 subject to majority of votes of 75% or more. A positive value of the right to liquidate does not imply the imminent liquidation of Frontclear.

The table below provides an overview of valuations of the PPN. The final column reflects the value of the PPN under a scenario where new capital commitments to FCC are included in the level 3 proxy valuation. This value corresponds to the business case for FCC and is used to negotiate new commitments to FCC:

(all amounts in USD)	Fair value Proxy Value Committed Capital	Fair value Collective right to liquidate	Fair Value at 31 December	Business case Total PPN of USD 200 million
Senior Notes	-	-	-	-
Junior Notes	6,475,559	19,924,441	26,400,000	27,380,826
Subordinated Notes	2,405,703	1,662,286	4,067,989	10,392,535
Total	8,881,262	21,586,727	30,467,989	37,773,361

A reported fair value exceeding the redemption value does not imply that investors can monetize that value by redeeming their commitment. Furthermore, as FCC does not have an obligation to its investors to distribute more than the redemption value at liquidation, a negative equity position resulting from a reported fair value exceeding the redemption value of the notes does not imply a going concern issue but reflects the perceived value of the future performance of FCC.

The entrance of new investors in the Frontier Clearing Funds will be subject to negotiation of an acceptable risk premium to both parties and the price against which new PPN are issued to the Frontier Clearing Funds may therefore deviate from the prices reported in the final column. The resulting agreed upon risk premiums will serve as input for the valuation model, in line with the description above.

In line with the above, at 31 December 2016 the Junior Notes are valued at USD 26,400,000 (2015: USD 26,400,000) and the Subordinated Notes at USD 4,067,989 (2015: USD 4,564,156).

Sensitivity analysis

The input parameters for the proxy model are reassessed as part of the business planning cycle towards the end of each calendar year. The uncertainty of each significant input reflects the measure of uncertainty that FCC faces in estimating each significant input (1 is less uncertain, 5 is most uncertain) over the projected horizon. The sensitivity of the inputs is measured in terms of the changes in value of the Junior Notes. None of the reasonable possible changes impacts on the value of the other PPN.

The significant unobservable inputs for the calculation of the proxy fair value as per 31 December 2016 are defined as follows in the context of the projected horizon being 15 April 2030.

	Uncertainty Capital	Inputs	Reasonable possible change	Change in proxy fair value in USD 1,000	
				Junior Note	Subordinated Note
Risk Capital ¹	4	12.5	-1	(637)	-
Leverage (down)	2	2.8	- 0.3	(2,062)	-
Leverage (up)	2	2.8	+0.3	637	3,876
Pricing	4	2.5%	- 0.5%	(4,125)	-
OPEX	1	3,758	+ 10%	(1,560)	-
Risk costs (in 1,000 USD)	2	15,000	+ 15,000	(5,156)	-
Utilization rate	2	95%	-10%	(2,171)	-

The redemption value of the PPN is based on the level of Available Cash at the measurement date. The level of Available Cash is driven by the commercial operations of FCC and is subject to business risk, i.e. the ability of FCC to generate cash from its business activities and the operational expenses incurred in the course of these activities.

¹ Weighted average maturity - years

12. Tax position

The movement of the tax position is as follows:

(all amounts in USD)	2016	2015
Opening balance	83,861	-
Recognition of a deferred tax asset	(672,423)	(950,100)
Recognition of a deferred tax liability	674,042	1,033,961
Deferred tax liability end of year	85,480	83,861

Deferred tax asset

The deferred tax asset relates to the net operating loss for tax purposes. The revaluation of the PPN for accounting purposes has been deferred and the depreciation of Intangible fixed asset is adjusted from 3 to 5 years for tax purposes, resulting in a taxable loss at 31 December 2016 of USD 2,689,692 (2015: USD 3,800,402). The resulting deferred tax asset has been recognized as it is probable that sufficient taxable profit will be available to use the net operating loss.

Deferred tax liability

The revaluation of the PPN for accounting purposes has been deferred for tax purposes, resulting in a temporary difference between the accounting book base and the tax book base. The temporary difference at 31 December 2016 amounts to USD 2,696,167 (2015: USD 4,135,844) which results in a deferred tax liability at 31 December 2016 of USD 674,042 (2015: USD 1,033,961). FCC offsets tax assets and liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority. The deferred tax asset and liability relate to income taxes levied by the same tax authority and have been offset, resulting in a net deferred tax liability at 31 December 2016 of USD 85,480 (2015: USD 83,861).

13. Financial guarantee contracts

The following guarantees were outstanding at 31 December 2016:

(all amounts in USD)	Gross notional exposure	Hedged	Net notional exposure	Fair Value
Kenya (Repurchase agreement)	25,000,000	(10,000,000)	15,000,000	116,330
Nigeria (Cross Currency Swap)	15,000,000	-	15,000,000	140,209
Total	40,000,000	(10,000,000)	30,000,000	256,539

Issued Guarantees - Fair value information

The fair value of issued guarantees is set at the price received for each guarantee at inception and to the price that would be required for each guarantee at any consequent measurement date. Changes in fair value are recorded in the Statement of Comprehensive Income.

FCC guarantees interbank transactions that may be subject to wrong-way risk, i.e. the risk that the exposure at default and loss given default rise together with the probability of default in relation to one of the counterparties to the trade. General wrong-way risk arises when the probability of default of the risk client and the exposure at default and loss given default are influenced by the same country risk factors. Specific wrong-way risk arises when the default of the obligor bank is likely to affect the market parameters driving the exposure at default and loss given default, e.g. by triggering a currency crisis.

FCC is expected to pay out under its guarantees in case a default of an obligor occurs simultaneously with a country event. In case of an idiosyncratic default of the obligor bank, i.e. not occurring simultaneously with a country event, the loss under the guarantee is expected to be minimal as a result of the collateral requirements imposed on the interbank transaction guaranteed.

Given the bespoke nature of the guarantees, their fair value cannot be determined by market prices or observable inputs only. The price required at the consequent measurement date is therefore determined by non-observable inputs (level 3 model), determining the expected loss under the guarantee over the remaining lifetime of the guarantee.

Level 3 model

The level 3 model is based on the exposure at default and loss given default of each guarantee conditional on the simultaneous occurrence of a country event at the time of default of the risk client, multiplied by the probability of such simultaneous occurrence.

The exposure at default and loss given default for each guarantee are assessed as part of the required economic capital per transaction. The economic capital model assesses the exposure under any guarantee as a result of losses due to the conversion of collateral to local currency cash under illiquid market circumstances and the conversion of local currency cash to USD. The parameters involved are reviewed at least annually as part of the country and counterparty review process and are subject to the review and approval of the Investment Committee. The economic capital model is reviewed annually as part of the internal capital adequacy assessment procedure and is subject to the approval of the FCC Supervisory Board.

The probability of default is derived from observable spread of CDS contracts or USD denominated government securities of the country of the obligor bank. The resulting probability of default of the country is multiplied with a correlation scaling factor that reflects the level of general and specific wrong-way risk of the obligor bank. The correlation between an obligor bank and country event is determined based on the rating of the country and the ranking of the obligor bank within the country.

The level 3 model uses the following significant unobservable inputs for determining the fair value:

<i>Description</i>	<i>Definition</i>
FX jump factor	The percentage by which a currency is expected to depreciate during a country event
Recovery rate	The percentage of the collateral value that can be recovered during a country event
Correlation scaling factor	The factor by which the probability of default of a risk country is multiplied to reflect the probability of a simultaneous occurrence of a country event and default of the obligor bank
Collateral terms	Terms agreed between the transacting counterparties in the interbank transaction guaranteed, i.e. type of collateral, haircuts, initial margin. The collateral terms are in principle fixed once agreed between parties.

Obligations under guarantees issued by FCC rank senior to any obligations of FCC under the Profit Participating Notes. Own credit risk will only be considered in relation to the fair value of guarantees in case the sum of fair values approximates the level of Available Cash (see Note 11).

In case FCC has obtained risk mitigation for guarantees issued, the reported fair value reflects the gross exposure under the guarantee to FCC.

Sensitivity analysis

The uncertainty of each significant input reflects the measure of uncertainty that FCC faces in estimating each significant input (1 is less uncertain, 5 is most uncertain) over the lifetime of each guarantee and the contribution to the outcome (1 is low, 5 is high). The sensitivity of the inputs is expressed in terms of the impact being linear or non-linear:

(all amounts in USD)	Uncertainty (1-5)	Contribution (1-5)	Reasonable possible change	Change in fair value
FX jump factor	4	5	+/- 10%	Linear (+/- 10%)
Recovery rate	2	2	+/- 10%	Non-linear (< +/- 10%)
Correlation scaling factor	4	2	+/- 5%	Linear (+/- 5%)
Collateral terms	1	4	n/a	Non-linear
Probability of default	2	5	+/- 1%	Linear (+/- 1%)

The significant inputs are country and counterparty specific and reviewed at least annually by the Investment Committee.

14. Accrued fees

(all amounts in USD)	2016	2015
Accrued Senior Notes fees	56,712	56,712
Accrued Subordinated Notes fees	43,858	43,858
Total Accrued fees	100,570	100,570

15. Management fee payable

Management fee payable	333,110	140,593
Total management fee payable	333,110	140,593

16. Other liabilities

Other liabilities	25,873	174,889
Total other liabilities	25,873	174,889

17. Off-balance-sheet rights, obligations and arrangements

Deferred performance fee

On 4 March 2016, the Supervisory Board of FCC awarded FCM with a Performance Fee for its performance during 2015. The amount of USD 225,270 is deferred in accordance with clause 5 of Schedule 2 of the FCC Management Agreement, with payment conditional on FCC achieving operational break-even.

On 28 February 2017, the Supervisory Board of FCC awarded FCM with a Performance Fee for its performance during 2016. The amount of USD 207,829 is deferred in accordance with clause 5 of Schedule 2 of the FCC Management Agreement, with payment conditional on FCC achieving operational break-even.

The total amount of deferred Performance Fee in accordance with the above is therefore USD 433,099 (2015: USD 225,270).

18. Change in fair value financial guarantee contract

(all amounts in USD)	For the period 1 December 2014 through 31 December 2015	
	2016	2015
Fair value of contracts at beginning of the period	-	-
Fair value of contracts issued during the period at inception	1,085,666	-
Fair value of contracts at end of the period	(256,539)	-
Change in fair value financial guarantee contracts	829,127	-

19. Guarantee expenses

(all amounts in USD)	For the period 1 December 2014 through 31 December 2015	
	2016	2015
Hedging costs	151,630	-
Acquisition costs	44,226	-
Total guarantee expenses	195,856	-

20. Standby fees Senior Notes

The Standby fees Senior Notes are fees calculated based on 0.50% per annum based on the Standby Senior Commitment. The Standby Senior Commitment equals the Senior Commitment (as per 31 December 2016: USD 45 million) reduced by the Effectuated Senior Commitment (as per 31 December 2016: USD nil). The fees are paid to FCC Senior.

21. DTAF Fee Subordinated Notes

The DTAF Fee Subordinated Notes is a fee calculated based on 2% per annum based on the Subordinated Notes outstanding. The fees are paid to FCC Subordinated.

22. Counter Guarantee fee

The Counter Guarantee fee is a fee calculated based on the counter guarantee agreement between FCC and KfW. The agreement guarantees the financial obligations of FCC towards third parties under financial guarantee contracts, in case FCC is unable to meet such obligations. The guaranteed amount is the sum of the aggregate of the nominal amounts of the Subordinated Notes, Junior Notes and the paid-in Senior Notes as per the PPN Agreement and with a maximum of USD 100 million. Depending on FCC's credit rating a counter-guarantee fee is charged between 1.00 % and 1.25% of the guaranteed amount. At 31 December 2016, the nominal amounts of the outstanding notes amount to USD 37.3 million.

23. Interest income

(all amounts in USD)	For the period 1 December 2014 through 31 December 2015	
	2016	2015
Interest income	140,432	21,045
Total interest income	140,432	21,045

24. Management fee

FCM is the manager of FCC. The fee for this service is based on the FCC Management Agreement between FCC and FCM. For the period ended 2016 the management fee amounts to USD 2,122,365 (EUR 1,931,848) (2015: USD 1,371,922 (EUR 1,250,192)) and is in accordance with the budget approved by the Supervisory Board.

The management fee has been invoiced to FCC by FCM in EUR and is recorded in FCC at month-end exchange rates. The following table provides the breakdown of the management fee invoiced:

(all amounts in EUR)	For the period 1 December 2014 through 31 December 2015	
	2016	2015
Activated expenses	21,824	17,538
Salaries & Remuneration	920,435	863,270
Business Development, Travel & Sundry	309,339	151,884
Third Party Service Providers	229,466	98,501
Insurance Costs	106,851	19,183
Subscription & License Fees	83,123	43,426
Information Technology	6,297	3,718
Office Expenses	102,111	51,701
Other	152,402	971
Total management fee in EUR	1,931,848	1,250,192

The balance for Third Party Service Providers includes commercial legal fees of EUR 89,830 (2015: EUR 26,845) and audit fees related to FCC of EUR 39,107 (2015: EUR 15,000).

25. Performance fee

(all amounts in USD)	For the period 1 December 2014 through 31 December 2015	
	2016	2015
Performance fee	164,626	-
Total Performance fee	164,626	-

On 4 March 2016, the Supervisory Board of FCC has awarded FCM with a Performance Fee being the sum of USD 225,270 and EUR 149,440 in relation to its performance as Fund Manager and Manager in 2015. FCM has invoiced FCC for the amount of EUR 149,415 in 2016.

The amount of USD 225,270 is deferred in accordance with clause 5 of Schedule 2 of the FCC Management Agreement, with payment conditional on FCC achieving operational break-even.

26. Third party service providers

(all amounts in USD)	2016	For the period 1 December 2014 through 31 December 2015
Back office services	110,847	81,755
Quantifi PMS – license fee	104,056	163,565
Other IT costs	-	50,000
Total third party service providers	214,903	295,320

27. Related party transactions

Related party transactions are transfers of resources, services or obligations between related parties and FCC, regardless of whether a price has been charged. Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions or is part of key management of FCC. The following parties are considered related parties.

Managing Board

FCM received remuneration for services provided as FCC's statutory director which is included in the overall agreement with both parties. See below under Manager for further details.

Supervisory Board

The Supervisory Board members are entitled to receive fixed annual fees of USD 25,000 for the Chairman and USD 20,000 for each other member. The amount expensed each year depends inter alia on the VAT treatment of the fees, the timing of actual payments and Supervisory Board appointments.

Manager

FCM is appointed as the Manager of FCC in accordance with the terms of the FCC Management Agreement. The main responsibilities of the Manager are to manage FCC's investments according to FCC's investment guidelines and risk management and operational guidelines, to represent FCC in communication with its stakeholders, counterparties and services providers and to ensure the FCC's optimal access to international and local markets to promote the FCC's products.

Management and performance fee

Under the terms of the FCC Management Agreement, the Manager receives a Management Fee to cover operational expenses made in relation to the management of FCC and a Performance Fee as remuneration for its services. The Management Fee paid to FCM in 2016 is disclosed under Note 24. The Performance Fee over 2016 is substantially based on discretionary elements subject to the approval of the FCC Supervisory Board in 2017 and subsequently no accrual has been included as per 31 December 2016.

28. Incorporation costs 2015

The origination costs of USD 1.2 million reflect the incorporation costs incurred to set up the business of FCC, to obtain legal and fiscal advice and to obtain tools for operating the business. The costs have been incurred by the technical assistance fund of The Currency Exchange Fund N.V. prior to first financial close, in return for which a subscription of USD 1.2 million in FCF Subordinated has been granted to The Currency Exchange Fund N.V. and for which FCC has subsequently issued Subordinated Notes to FCF Subordinated at first financial close on 15 April 2015. The cash proceeds of the issuance of Subordinated Notes at first financial close amounted to USD 7,500,000 as a result.

29. Other operating expenses

(all amounts in USD)	For the period 1 December 2014 through 31 December 2015	
	2016	2015
Supervisory Board	77,536	70,503
Audit & Financial Reporting	47,985	-
Bank costs	2,281	2,603
VAT costs	20,157	-
Other operating expenses	-	57,684
Total other operating expenses	147,959	130,790

30. Proposal appropriation of result

Based on the results over the year ended December 31, 2016, the Board of Directors proposes to deduct the result of USD (31,769) from the other reserves.

OTHER INFORMATION

Statutory requirements for processing results

Article 24. PROFITS AND RESERVES

24.1 The general meeting is authorised to appropriate the profits, which are determined by adoption of the Annual Accounts and to determine distributions, in as far as the shareholders' equity of the Company exceeds the reserves which must be maintained pursuant to the law. Notwithstanding the provisions of the previous sentence and in accordance with the provisions of article 24.4, the management board is authorised to resolve to decide to make interim distribution of profits

24.2 The general meeting shall determine the allocation of the accrued profits. In calculating the amount of profit, that shall be distributed on each share, the nominal value of the shares shall be taken into account, regardless if these shares have been fully paid up.

24.3 A distribution of profits shall take place after the adoption of the Annual Accounts. The distribution of profits shall be due for payment within two weeks after the resolution of the management board to approve the distribution as meant in article 24.6, unless the management board for reasons of special circumstances resolves otherwise.

24.4 Subject to article 24.1, the management board may resolve to interim distribution of profits. The management board shall not resolve to decide to make interim distributions if it knows or reasonably should foresee that the Company shall get into a position in which it cannot continue to pay its due and payable debts after the distribution.

24.5 The general meeting may resolve to make distributions out of a reserve in whole or in part.

24.6 A resolution to distribute profits or reserves shall not have consequences as long as the management board has not granted its approval. The management board shall only withhold its approval if it knows or reasonably should foresee that the Company cannot continue to pay its due and payable debts after the distribution has been made.

24.7 The claim of a shareholder to receive any distributions shall lapse within five years after they have become due for payment.

24.8 In calculating the amount of any distribution on shares, shares held by the Company shall be disregarded.

Auditor's report of the independent accountant

The auditor's report is included on the next page of this annual report.

Auditor's report

To: the shareholders and the supervisory board of Frontier Clearing Corporation B.V. and the managing board of Frontclear Management B.V.

Report on the audit of the financial statements 2016 included in the annual report

Our opinion

We have audited the financial statements 2016 of Frontier Clearing Corporation B.V., based in Amsterdam.

In our opinion the accompanying financial statements give a true and fair view of the financial position of Frontier Clearing Corporation B.V. as at 31 December 2016, and of its result and its cash flows for 2016 in accordance with International Financial Reporting Standards as adopted by the European Union (EU-IFRS) and Part 9 of Book 2 of the Dutch Civil Code.

The financial statements comprise:

- The statement of financial position as at 31 December 2016
- The following statements for 2016: the statements of comprehensive income, changes in equity and cash flows
- The notes comprising a summary of the significant accounting policies and other explanatory information.

Basis for our opinion

We conducted our audit in accordance with Dutch law, including the Dutch Standards on Auditing. Our responsibilities under those standards are further described in the "Our responsibilities for the audit of the financial statements" section of our report.

We are independent of Frontier Clearing Corporation B.V. in accordance with the Verordening inzake de onafhankelijkheid van accountants bij assurance-opdrachten (ViO, Code of Ethics for Professional Accountants, a regulation with respect to independence) and other relevant independence regulations in the Netherlands. Furthermore we have complied with the Verordening gedrags- en beroepsregels accountants (VGBA, Dutch Code of Ethics).

We believe the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Report on other information included in the annual report

In addition to the financial statements and our auditor's report thereon, the annual report contains other information that consists of:

- Report from the managing board
- Other information pursuant to Part 9 of Book 2 of the Dutch Civil Code
- Report from the supervisory board

Based on the following procedures performed, we conclude that the other information:

- Is consistent with the financial statements and does not contain material misstatements
- Contains the information as required by Part 9 of Book 2 of the Dutch Civil Code.

We have read the other information. Based on our knowledge and understanding obtained through our audit of the financial statements or otherwise, we have considered whether the other information contains material misstatements. By performing these procedures, we comply with the requirements of Part 9 of Book 2 of the Dutch Civil Code and the Dutch Standard 720. The scope of the procedures performed is less than the scope of those performed in our audit of the financial statements.

The managing board is responsible for the preparation of the other information, including the report from the managing board in accordance with Part 9 of Book 2 of the Dutch Civil Code and other information pursuant to Part 9 of Book 2 of the Dutch Civil Code.

Description of responsibilities for the financial statements

Responsibilities of the managing board and the supervisory board for the financial statements

The managing board is responsible for the preparation and fair presentation of the financial statements in accordance with EU-IFRS and Part 9 of Book 2 of the Dutch Civil Code. Furthermore, the managing board is responsible for such internal control as the managing board determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

As part of the preparation of the financial statements, the managing board is responsible for assessing the company's ability to continue as a going concern. Based on the financial reporting frameworks mentioned, the managing board should prepare the financial statements using the going concern basis of accounting unless the managing board either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so. The managing board should disclose events and circumstances that may cast significant doubt on the company's ability to continue as a going concern in the financial statements.

The supervisory board is responsible for overseeing the company's financial reporting process.

Our responsibilities for the audit of the financial statements

Our objective is to plan and perform the audit assignment in a manner that allows us to obtain sufficient and appropriate audit evidence for our opinion.

Our audit has been performed with a high, but not absolute, level of assurance, which means we may not have detected all material errors and fraud.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. The materiality affects the nature, timing and extent of our audit procedures and the evaluation of the effect of identified misstatements on our opinion.

We have exercised professional judgment and have maintained professional skepticism throughout the audit, in accordance with Dutch Standards on Auditing, ethical requirements and independence requirements. Our audit included e.g.:

- Identifying and assessing the risks of material misstatement of the financial statements, whether due to fraud or error, designing and performing audit procedures responsive to those risks, and obtaining audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control
- Obtaining an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control
- Evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the managing board
- Concluding on the appropriateness of the managing board's use of the going concern basis of accounting, and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause a company to cease to continue as a going concern
- Evaluating the overall presentation, structure and content of the financial statements, including the disclosures
- Evaluating whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation

We communicate with the managing board and the supervisory board regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant findings in internal control that we identify during our audit.
